

Music Guidelines

Copyright is very important and we will not accept entries that use music the filmmakers do not have the rights to. We understand that can be difficult sometimes, so here are some websites you can download royalty free music from for use in film.

It's always still a good idea to contact a musician to inform them about the use of their music where possible, and to read the fine print to ensure it has permission for use in film.

When choosing your music try to consider the mood you are trying to create and choose accordingly rather than choosing music just because you like it.

Free Music Archive

<https://freemusicarchive.org/>

Bensound

<https://www.bensound.com/>

Sound Bible
