

Copyright guidelines for audio, video and photos

Acknowledging the creative work of other creatives is essential. We will not accept entries that use audio, video and photos that the filmmakers do not have the rights to.

If you need to add any digital assets to your film and are unable to get permission from the creator, you can access a number of websites that provide royalty free assets that are often accompanied by a Creative Commons licence. Ensure you read and understand the licencing requirements of each asset and acknowledge these requirements in your film credits.

Films that do not credit assets that are owned by another creator will not be eligible for competition.
